

The LEOPARD I body armor system has the latest advances in bulletproof vests. The inner part has a thermoregulating fabric that allows it to be used in various climatic conditions, extreme heat or cold, providing comfort to the user, it also includes the laser-cut molle system and three alternative pockets for equipment, as well as low-profile Nylon. Low weight, waterproof, resistant to fire, tearing and discoloration, allowing high performance, comfort and a long useful life.
